## SWANN GOES AFTER BOOSTERS OF MILK PRICE TO 14 CENTS

Orders Investigation of Dairy-men and Declares Donnelly Act Has Been Violated.

The combination and agreement on the part of the Dairy-men's League to raise the price of milk and the practical blacklisting of distributors who refuse to comply with their demand is a violation of the Donnelly State law against combination in restraint of trade, in the opinion of District Attorney Swann, and he has assigned Assistant District Attorney

James H. Swann to take charge of the investigation of the milk situation. Under the new conditions, the price of milk has risen to 14 cents a quart, a price which is not justified by the cost of production.

The league has also directed its members that none of them shall supply the distributors unless the price of milk is to be jumped again on Nov. 1. The league operates on five points.

The price of milk has increased greatly in price and so has the cost of labor, also taken, and they claim their act is one of industrial self-preservation.

## BRITISH THREATEN OSTEND, FRENCH STRONGER, SAYS BAKER

(Continued from First Page.)

Along the Aisne thirty-five new divisions this year.

"So great has the wastage of enemy forces become, owing to the improved mechanical means of the Allies and the perfection of their methods of combat, that the Germans are obliged to maintain in reserve as a minimum guarantee for the safety of their battle line in the west, at least forty divisions. The western front thus remains the principal battlefield of the war. It is still strongly held by the enemy, and his defensive strength, while shaken, remains powerful."

The situation on the other fronts is disclosed with a brief review of recent official despatches. The only mention of American forces, is as follows:

"The mobilization of the National Guard in their camps is proceeding rapidly and the formation of reorganized divisions is taking place. This reorganization is necessitated by the conditions of the present war and requires larger regiments and certain machine guns and other units not typical heretofore. Some misunderstanding of the reorganization has arisen, but its purpose and military necessity are being explained and the division commanders are doing their utmost to preserve the local associations and historic memories of these State forces."

"The assembling of the national army in the cantonments has gone on with smoothness and success. Equipment difficulties are not serious and are being rapidly overcome. The most obvious shortage is in rifles, but an adequate supply for all purposes will soon be at hand and not delay in training results from the shortage. All overseas forces are, of course, adequately supplied."

## JAPAN'S OPEN DOOR PLEDGE REASSURING, SAYS TAFT

Calls Ishii's Declaration One of Most Important Ever Made in Relations With U. S.

"One of the most important informal official announcements ever made in regard to the relations between Japan and the United States," was the way former President William H. Taft today described Viscount Ishii's pledge that Japan will hold the door open to China. Mr. Taft's expression was given in a telegram to the United Press from New Haven. He also emphasized the fact that Japan had been scrupulously careful throughout her relations with the United States to observe every detail of "gentlemanly agreement" and her treaties as making the Japanese Commissioner's pledge all the more significant.

"The statement," Mr. Taft telegraphed, "should relieve the representative alarm over the purpose of Japan in the Far East. It manifested a spirit of friendship to the United States and a pledge to maintain and preserve China from spoliation which was most reassuring."
